

Frank,

I would like to take the opportunity to thank you personally for your enthusiasm and efforts with our project. When I initially contemplated going with an alternative building system to Besser Blocks I had no idea how simple it would be. The thing that convinced me was the discussion I had with the owner at Pinjarra Hills.

The simplicity of Eco Blocks is fantastic and the options of different thickness walls is great. To be able to use the same shell and just change the connectors is so simple. When Viktor and I started pouring the first main wall which is 3 meters high everyone told me it can't be done and it will blow out which I think is as a result of other lesser systems failing. The builder I previously used on other projects did not want to know about it and I am so glad that was his stance otherwise I would never have met Viktor. Eco Blocks and Viktor are a good combination and by drilling the holes at the midpoint and filling up to that level then plugging the holes and filling to the top an hour later was enough time to allow the wall to go up safely. Having Tony there that day gave me great peace of mind.

As you know I have helped Viktor assemble the walls and this has helped reduce the costs to us. I would not be able to help the bricklayers with besser blocks.
Its QUICK, SIMPLE and STRONGER. Love it.

I have recommended to a number of the guys in the office for them to have a look in the future when they start their own renovations and anyone you need to bring around to look at the applications where we have used it is fine with me, just let me know so the dog doesn't go bailing you up again.

Thanks for the coffee on Saturdays as well.

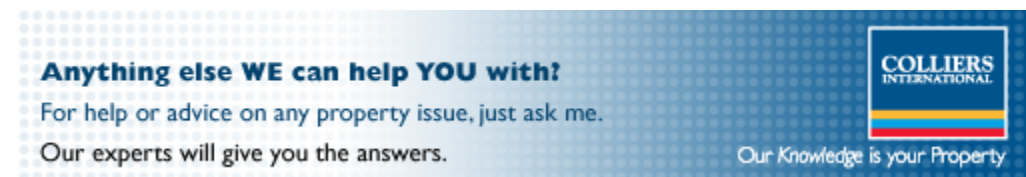

Regards,

Ian Carrigan
